

AIA/CES Registered Provider Program Summary

- Provider:** DeBourgh Mfg. Co.
- Program:** *Factory Tour: Manufacturing Facility*
- Length:** 6 Hours
- Credits:** 6 LU Hours **HSW:** Yes
- Description:** A comprehensive factory tour of a modern manufacturing facility located in southeastern Colorado.
- Learning Objective:** At the end of this session, participants will be able to: 1) Identify environmentally-friendly procedures and processes that can be incorporated into the modern manufacturing facility; 2) Know what the Climate Wise and EPA Greenlight programs are and how they can impact your "green" projects. 3) Incorporate "green" requirements into the specifications for new construction.
- A/V Needed:** Electrical power and screen for Power Point and video presentation.
- Target Audience:** Architects, owners, specifiers, and other design specialists who want to become more aware of the environmental issues involved in manufacturing today. Ideal group size is 8-15 persons (a minimum of 2 is required).
- Facilitator Qualifications:** DeBourgh Mfg. Co. has been the world leader in the all-welded locker industry for over 70 years. DeBourgh Mfg. Co. is a member of both Climate Wise and the EPA Greenlight programs. DeBourgh Mfg. Co. is a 2000, 2001, 2002, & 2004 recipient of the OSHA Sharp award for excellence in occupational safety and well being.
- Cost:** The cost of the factory tour is to be negotiated at the time of reservation.
- Contact:** Marty Lee, Director of Regional Sales
