

## AIA/CES Registered Provider Program Summary

**Provider:** DeBourgh Mfg. Co.

**Program:** *Specifying High Security, Low Maintenance Lockers for Schools and Universities*

**Length:** 1.5 hours (2-hour version also available)

**Credits:** 1.5 LU Hours **HSW:** Yes

**Description:** A review of major industry locker features that produce high security and low maintenance.

**Learning**

**Objective:** At the end of this session, participants will be able to: 1) List at least three features that will increase security while reducing maintenance; 2) Determine paint specifications that will last longer and be more environmentally friendly; 3) Determine the best specification for different customer needs, e.g., Performance Specification, Master Spec Specification, Base/Alternate Specification, or Open specification.

**A/V needed:** Electrical power and screen (clear wall can be used) for laptop power-point presentation.

**Target**

**Audience:** Architects, specifiers, owners, and other design specialists. Ideal group size is 8-15 persons (minimum number of 2).

**Facilitator**

**Qualifications:** DeBourgh Mfg. Co. has been the world leader in all-welded lockers for schools and universities. DeBourgh has been an AIA/CES provider for over three years.

**Cost:** N/A: There is no cost to bring this program into a firm or chapter meeting.
